	INFORMATION R	EPORT	CD NO.	25X1
COUNTRY	Germany (Soviet Zone)		DATE DISTR.	28 December 1950
SUBJECT	Coal Distribution Plan for July and Augu	st 1950	NO. OF PAGES	2
PLACE ACQUIRED	25X1 25X1		NO. OF ENCLS.	
DATE OF INFO.			SUPPLEMENT TO REPORT NO.	25% 1 \
THIS IS UNEVALUATED INFORMATION  25X1  THIS IS UNEVALUATED INFORMATION  THIS IS UNEVALUATED INFORMATION  THIS IS UNEVALUATED INFORMATION  1.0 It was planned that the following amounts of coal be available for distribution:				
	Crude lignite * 11,60 Briquettes * 3,20 Lignite carbonization coke (Braun- kohlen Schwelkoks) * 12 Coal (Steinkohle) - Zwickau (N 52/ A 23) * 26 Coal - imported from Poland ** 25 Foundry coke (Zechenkoks) - Zwickau* Foundry coke imported from Poland ** Foundry coke imported from Czechoslovakia **	00,000 tons 00,000 tons 00,000 tons 00,000 tons 00,000 tons 00,000 tons 00,000 tons		
2.	Lignite briquettes * 3,20 Lignite carbonization coke * 42 Coal - Zwickau * 29 Coal - imported from Poland ** 29 Foundry coke - Zwickau * 2 Foundry coke - imported from Poland ** Foundry coke - imported from Czechoslovakia **	0,000 tons 0,000 tons 5,000 tons 0,000 tons 5,000 tons 0,000 tons 5,000 tons	Document No	25)(1)
25X1 * Comment. 25X1  the output aimed at for 1950 comprises 132 million tons of crude lignite, 37.5 million tons of lignite briquettes, 91 percent of the coal production in 1936 or about 3.3 million tons of coal, and 0.24 million tons of foundry coke. In event the planned figures indicated in the report are actually reached in July and Jugust and subsequent months, the annual production would be approximately 140 million tons of crude lignite; 38.4 million tons of lignite briquettes; 3.42 million tons of coal and 0.24 million tons of fruddry

lion tons of coal.

cake. The figures planned for the total 1950 production of crude lignite and of lignite briquettes would then be considerably exceeded, and, judging from previous information, such an excess over the plan seems possible. The coal production on the other hand is lagging about 20 percent behind the figures planned. See

Comment. The Soviet one of Germany can meet its requirements of crude lignite, lightle briquettes and lightle carbonization coke by its own production, but for coal and foundry coke the Soviet Zone is dependent on imports from 25X1 Poland, Czechoslovakia and the Ruhr District.

Inports from Edand as reported here, amount to about 3.75 million tons of coal, and about 1.1 million tons of foundry coke; the imports from Czechoslovakia comprise about 180,000 tons of foundry coke. Judging from a previous report, the Soviet Zone will import a total of about 2.5 million tons of coke from Poland and Czechoslovakia in 1950.

Comment. This information indicates that the annual production of gas coke will be about 750,000 tons; this would correspond to a production of around 1 mil-
